

## 3-2 How are igneous rocks formed?

### Lesson Review

Write the term that best completes each statement.

1. The temperature of Earth becomes \_\_\_\_\_ as you go deeper into Earth.
2. The \_\_\_\_\_ is the layer of Earth below the crust.
3. Melted minerals are called \_\_\_\_\_ rock.
4. When molten rock cools, \_\_\_\_\_ rocks form.
5. Molten rock below Earth's surface is called \_\_\_\_\_.
6. Molten rock can reach Earth's surface through \_\_\_\_\_ in Earth's crust.
7. Magma that pours into Earth's surface is called \_\_\_\_\_.
8. Lava that cools and hardens becomes \_\_\_\_\_ rock.

### Skill Challenge

**Skills:** *interpreting, identifying, applying definitions*

Use the labels on the diagram below to identify each structure described. Write your answer in the space with the same number as each description.

- |          |          |
|----------|----------|
| 1. _____ | 4. _____ |
| 2. _____ | 5. _____ |
| 3. _____ | 6. _____ |
